Madrid, Spain

Profile

I'm a professional Ruby developer, focused mostly on Rails, but am able to work from the server layer up to the client-side code. I truly enjoy programming, especially in Ruby, and am an active member of the local Madrid Ruby community. In my free time I enjoy working on side projects to learn new techniques and languages, such as Android or Redis.

Technical

Ruby	Rails	Linux
Python	Sinatra	Capistrano
Java	Backbone	Chef
Javascript	Jquery	RVM
PHP	SVN & Git	Amazon Web Services

Experience

Incuentra Technologies
Lead Developer
www.incuentra.es

July 2010 - Present

Led project creation from idea to current stage. Design site architecture and programmed both front and backends. Integrate with third parties via REST interfaces. Leverage Amazon's EC2, S3, RDS, and IAM services. Maintain servers using Chef and Unix tools. Continuous deployment with capistrano. Design and implement ideas presented by members of the company. Write unit and integration tests. Localized version for Mexico.

Technologies Used:

- Ruby on Rails (2.x and 4.x) with Ruby 1.8.7 and 2.0.0
- MySQL, Solr
- jQuery, Ext, Sass
- Git, RVM
- VirtualBox, Vagrant, VeeWee, Ubuntu, Amazon Web Services
- Chef, Capistrano
- Google Prediction API
- New Relic monitoring, Geckoboard custom dashboard
